

In this digital era, it is vital to ensure that the in-person experience continues to hold value to the diversity of your customers. Your unique spaces must facilitate a balance between maximizing efficiency and security while also promoting a personalized experience where customers see and feel the priority you place on them.

BUILDING EXCELLENCE

Through Partnership, Process & Design

FINANCIAL

SERVING WITH PURPOSE

We understand the importance of designing to your branding and the unique process of coordinating a project with a large-scale corporate team. We are mindful of elements for both customer & employee: digital signage, multi-functional community spaces (coffee bar, co-working) traffic flow (free standing concierge vs. traditional teller lines), security (private spaces for high value transactions, acoustical barriers for noise mitigation, money transport/storage), and accessibility (ADA compliance, parking lots & drive throughs).
